TITLE : CONTAINER CONVEYING DEVICE  
AND CONTAINER CONVEYING  
METHOD

ABSTRACT : PROBLEM TO BE SOLVED: To provide a container conveying device allowing appropriate prevention of a turnover of a container in conveying, requiring no stop of a line even in case of turning over, and capable of smoothly linearly conveying, changing a conveying direction and vertically moving the container with a simple structure.

SOLUTION: In this container conveying device, PET bottles Q1 are conveyed as grip tools E1 integrated with or fixed to a conveyer chain B1 combined in a continuous loop state grip the PET bottles Q1. The conveyer chains B1 connected to freely turn up and down or right and left, and guide members C1 guide and convey the PET bottles Q1.
